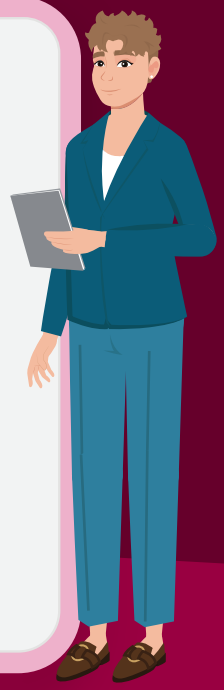
ORCID Benefits for Funders and Facilities



By integrating your systems with ORCID, you reduce the burden of administering awards and can better measure impact in a cost-effective way.

Increased research ROI

By contributing trusted funding data you hold about your awardees to their ORCID records, you can allow better tracking of research outcomes supported by your funding, ultimately leading to better resource allocation decisions.

Know your researchers

By linking your systems with the ORCID registry, you can ensure the right applicant is awarded, and enable better transparency throughout the funding process. Preserve the integrity of downstream analysis.

Enhanced ease of reviewer selection

By embedding Record Summaries, you can make the reviewer selection process easier and discover possible conflicts of interest. You can also assign reviewers based on previous contributions, even across other funders.

Reduced administrative burden for both your staff and researchers

Re-use of validated data found in ORCID records improves quality and accuracy and can save time, money and effort. Providing users an ORCID Single Sign-on reduces their frustration and burden of managing multiple credentials and saves time during submission, review, and reporting.

Accurate attribution and enhanced discoverability

Standardized identifiers and open data, such as provided by ORCID, can help increase discoverability, recognition, and accuracy of attribution of the research you fund or facilitate, even beyond the period of performance.

Interconnected infrastructure

Help accelerate knowledge discovery and increase the integrity, transparency and reproducibility of research by encouraging FAIR Data Principles and Open Science practices through persistent identifiers and standardized, openly-accessible data, such as that provided by ORCID.

Talking to your...

...researchers

ORCID can make it much easier to apply for funding, now and in the future. As a researcher who wants to secure funding or facility time, ORCID is a free, easy-to-use, online profile where you can gather all your professional affiliations, research outputs, and activities into one place.

When you give us permission to add grant data to your ORCID record, you'll be able to easily use it in the future when you apply for funding, or even submit a manuscript, since so many systems are connected to ORCID. This can save you a lot of time and effort!

...colleagues

ORCID can make it much easier for us to uphold research integrity, and the transparency of our funding process. With Record Summaries that help us see Trust Markers found in ORCID records, we can more easily corroborate the scholarly bonafides of researchers before awarding funding or time in/with the facility, and allows us to be transparent about our awards by adding that data to ORCID records.

It can also help us provide metrics about our impact, specifically, the researchers, publications, and funding that were resourced.

Do you already use one of the ORCID-certified Grant or Facility Application Management Systems?

Adopting ORCID into your workflows could be as easy turning the functionality on!
