R2 Orcid Researcher Messaging PRINT.pdf 1 16.10.2024 18:21

ORCID for Researchers

ORCID gathers all your research-related information in your own portable profile—that you control—so you can re-use it wherever you need.

Reduced administrative burden

A growing number of manuscript submission and grant application forms can be auto-populated with data from your ORCID record. Spend less time re-entering your data!

Portable profile data

ORCID acts as a hub for all your research-related information, so you can easily share it with an increasing number of funders, publications, data repositories, and other research workflows.

More time for research

Spend more time conducting your research and less time managing it when you allow the organizations you interact with to add data about your affiliations, publi cations, funding, or other data to your ORCID record.

Uniquely yours

Distinguish yourself and claim credit for your work while controlling access to your data, no matter how many people have your same (or similar) name.

Name flexibility

ORCID helps reduce complications resulting from name changes so you will no longer be limited to the name you used when you began your career.

Control your visibility and discovery

And you control the visibility of each piece of data. Easily see links to your research activities in one place—affiliations, funding, publications, and other contributions.

HOW DOES ORCID HELP RESEARCHERS?

ORCID makes your life easier as you build or manage your career. It is a free, easy-to-use, online profile that you control, where you can gather all your professional affiliations, research outputs, and activities in one place, and re-use that information in a growing number of places.

Think of your ORCID record as a hub of your research-related data that gets propagated throughout scholarly systems as you use it in different ways, such as applying for funding or submitting manuscripts.

When you give organizations permission to add the scholarly data they hold about you to your record, you'll likely save a lot of time and effort in the future each time you submit manuscripts or apply for funding, since so many systems are connected to ORCID and will allow you to sign in with your ORCID iD (and will import the data from your record right into their forms!)

Sign INTO your ORCID record if you have one, or sign UP for one if you don't!
