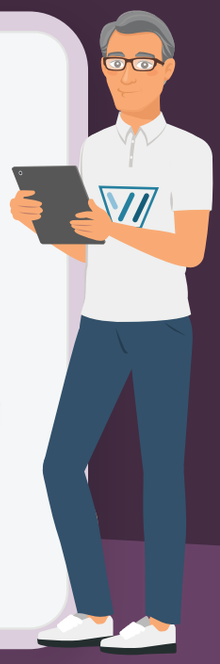
ORCID Benefits for Universities and Research Institutions

When you connect your systems with ORCID, you can more easily stay up to date with the research that comes from your scholars – while making their lives easier.



Easier assessment

Effectively track the research that comes from your institution by ingesting validated publication and funding data from your researchers' ORCID records.

Name disambiguation

Have confidence that you have correctly identified contributions from your researchers, regardless of the popularity or variability of their names.

Improved visibility of outputs

When you contribute the data you hold about your researchers to their records, you improve the visibility of their outputs and ensure they get the recognition they deserve.

Strengthen research integrity

When you add the data you hold about your researchers to their ORCID records, you improve the their trustworthiness—and you help strengthen the entire scholarly record as that data gets reused by other systems.

Reduced administrative burden

Increase both efficiency and quality in critical processes like assessment exercises. Avoid time spent re-entering data during submission, review, and reporting. When your researchers have more time to spend on research, you save money!

Better research connections

By contributing data about your researchers, you can follow their careers even after they leave your institution. Keep better track of collaborators and peers at other institutions.

Talking to your...

...researchers

"ORCID makes your life easier as you build or manage your career. It is a free, easy-to-use, online profile that you control, where you can gather all your professional affiliations, research outputs, and activities in one place.

When you give us permission to add data to your record, you'll likely save a lot of time and effort when you submit manuscripts, or apply for funding, since so many systems are connected to ORCID and will allow you to sign in with your ORCID iD (and will import the data from your record right into their forms!)"

...colleagues

"ORCID can help us uphold research integrity and join a global network of trusted data contributors. It's an easy and trusted way to connect our systems with the systems our researchers use, and ensures our name appears consistently throughout the scholarly ecosystem.

It's also a global standard platform that provides a trusted login process that will encourage our researchers to engage with our institutional systems, saving them time while ensuring the integrity of the research produced here.

Do you already use one of the ORCID-certified Research Information Systems?

Adopting ORCID into your workflows could be as easy turning the functionality on!
