ORCID provides a persistent digital identifier (an **ORCID iD**) that you own and control, and that distinguishes you from every other researcher.

Connect your iD with your professional information — affiliations, grants, publications, peer review, and more.

Use your iD to share your information with other systems, ensuring you get recognition for all your contributions, saving you time and hassle, and reducing the risk of errors.

Through linkages with other systems, **ORCID** improves discoverability and reduces repetitive data entry. Researchers control the privacy of the information displayed in their **ORCID** record, and determine what, how and with whom information is shared.
