ORCID's Certified Service Provider (CSP) Program - *Enabling Value for Members & Researchers*

3rd October 2024

Shivendra Naidoo - Senior Engagement Lead, ORCID https://orcid.org/0009-0005-6221-4682

Brief agenda:

- A quick reintroduction to ORCID
- Why have a Certified Service Provider (CSP) Program?
- An overview of ORCID's revamped CSP Program
- Current ORCID CSP Systems
- Results of our first CSP Program survey
- How can ORCID members maximize benefit?

FOR MEMBERS/ END USERS

FOR VENDORS / SERVICE PROVIDERS

A quick re/introduction to ORCID

FOR MEMBERS/ END USERS

FOR VENDORS / SERVICE PROVIDERS

ORCID is Community-driven

- An independent not-for-profit, open to participation by all
- Registry launched in 2012
- Sustained by fees from our member organizations
- Guided by our values and founding principles
- Community-governed by a Board of Directors representative of our membership

Where we want to go

ORCID's vision is a world where **all who participate** in research, scholarship, and innovation are **uniquely identified** and **connected to their contributions** across **disciplines, borders, and time.**

How we are going to get there

ORCID's mission is to **enable transparent** and **trustworthy connections** between **researchers**, their **contributions**, and their **affiliations** by providing a **unique, persistent identifier** for **individuals** to use as they engage in **research, scholarship, and innovation activities**.

ORCID provides three infrastructure services

The ORCID iD
A unique, persistent identifier free of charge to researchers (e.g. https://orcid.org/0000-0002-1108-3660)

An ORCID record
A digital CV/profile connected to the ORCID iD, that can include employment, education, funding, peer review, research output and other metadata

The ORCID APIs
A set of *Application Programming Interfaces* (APIs), as well as the services and support of communities of practice enabling interoperability between an ORCID record and member organizations

ORCID
Connecting research and researchers

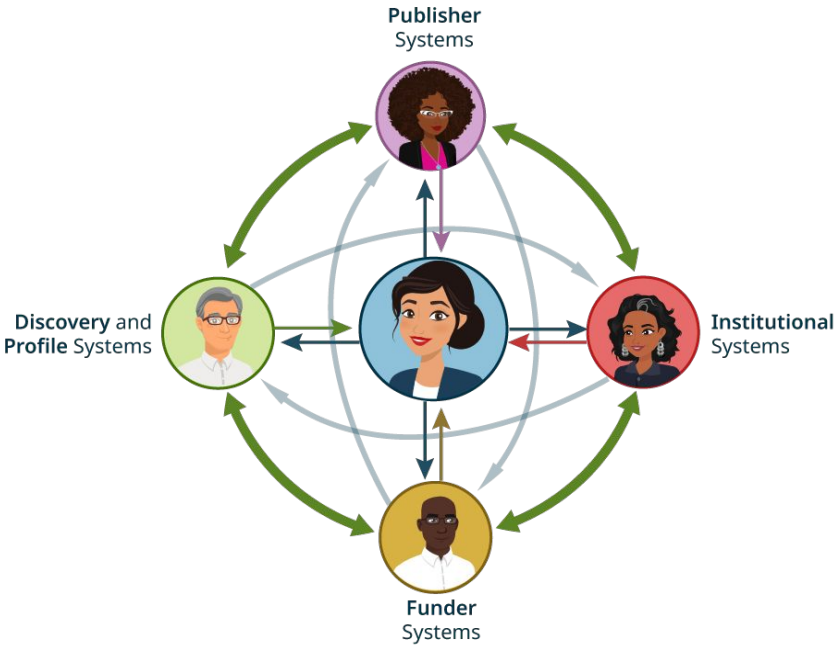
Why have a Certified Service Provider (CSP) Program?

FOR MEMBERS/ END USERS

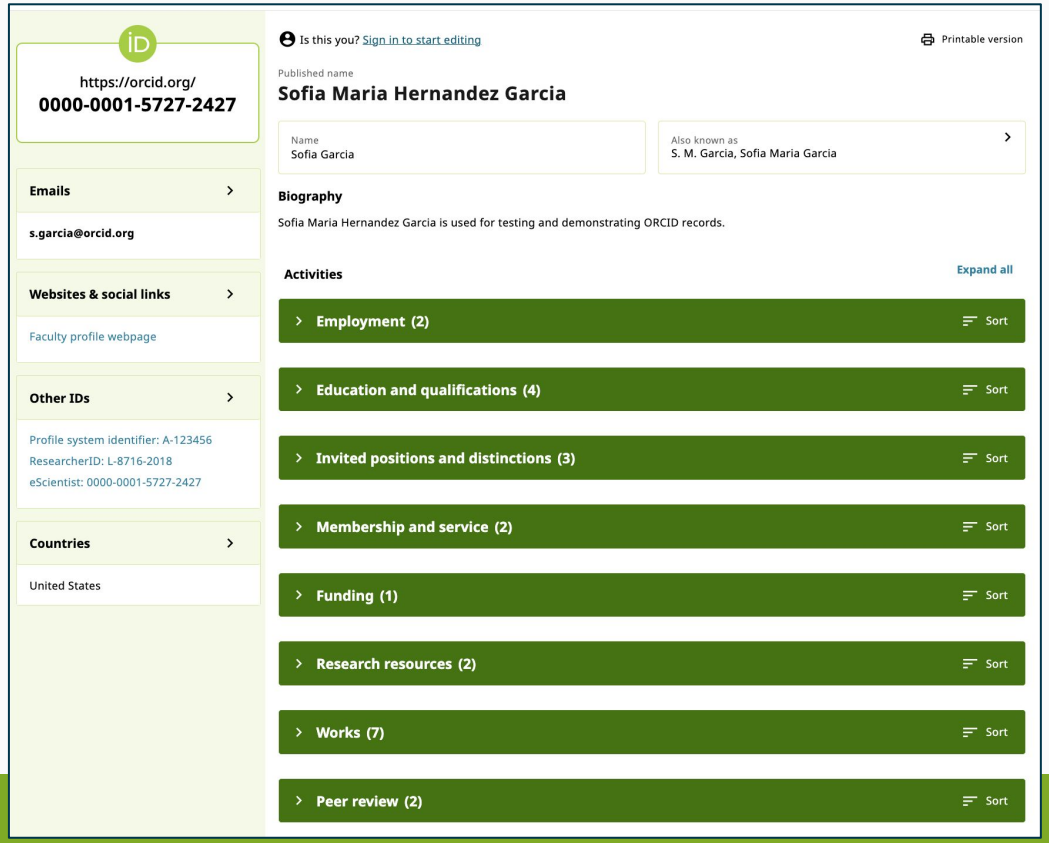
ORCID is a *hub* of research-related data that gets propagated throughout scholarly systems

The more **fully-populated ORCID records** and integrated systems there are, the more value that all stakeholders can gain from adopting ORCID.



Information on ORCID records can help decision makers

- Affiliations
- Professional activities
- Funding information
- Publications
- Other outputs
- Peer reviews
- Website URLs



Validated information is even more useful

In the context of an ORCID record, a *Trust Marker* is any item in that record that has been organizationally validated. So when:

- **research organizations** add **affiliations**, or
- **publishers** add **outputs** and **reviews**, or
- **funders** add **funding awards**

they provide **'trust markers'** that can be used to help in decision making.

Impactful research output

2023 | Article
DOI: 10.14454/07243.2013.001

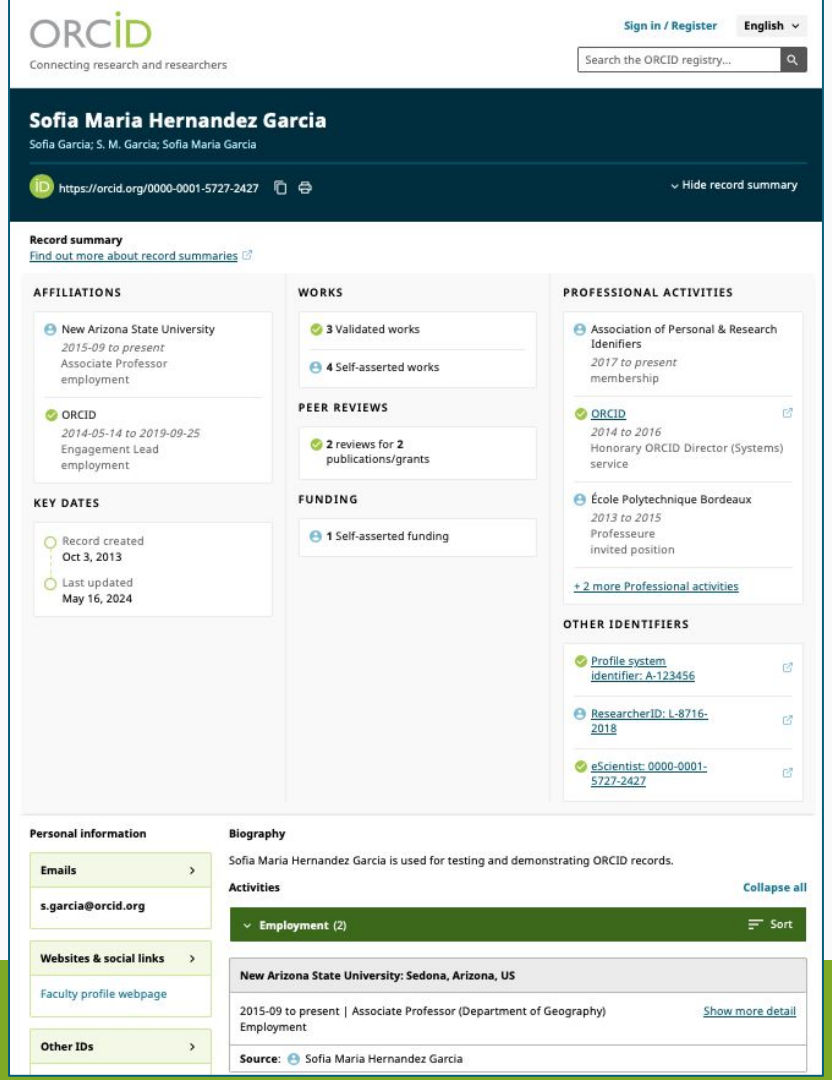
Source: Manuscript Submission System X

Review activity for **Journal Y** (1)

Journal, Journal Y
ISSN: 1532-1827

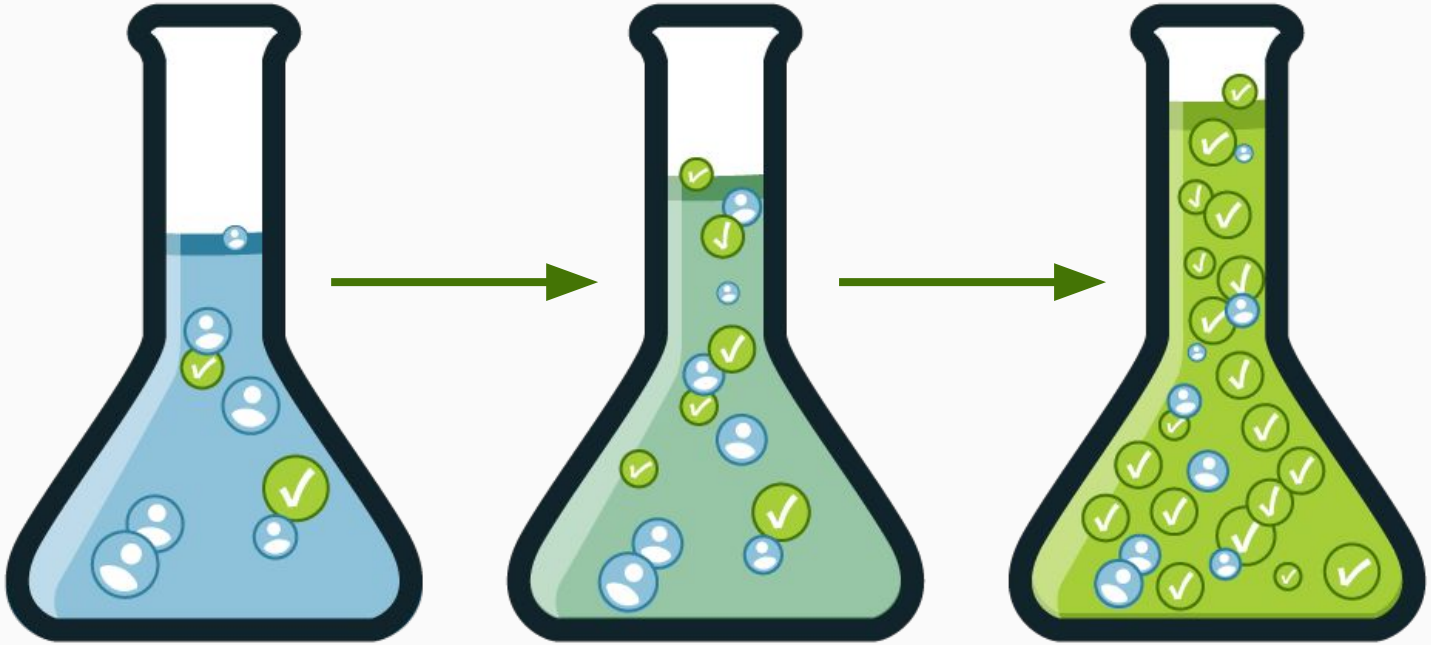
Review date: 2020-11-16 **Type:** Review **Role:** Reviewer

Source: Manuscript Submission System X



https://vimeo.com/495762735

As more ORCID members add data (and trust markers) to records, the more robust the entire scholarly record becomes



Service Providers *Enable Value* for Members & Researchers

By going beyond basic integration requirements and aiming for CSP best practices, Service Providers:

- ✓ **Offer members a quicker & easier way to integrate** (vs. a non-CSP system, or a custom systems developed in-house, both of which would require integration reviews)
- ✓ **Allow accurate, up-to-date metadata to be written to researchers' ORCID records**, increasing discoverability and reuse, while saving researchers time and effort
- ✓ **Increase the prevalence of trust markers in ORCID records**, demonstrating the provenance of metadata written to records, and strengthening global research integrity
- ✓ Offer member organizations **ORCID-related functionality that meets their needs**
- ✓ Ensure researchers (i.e. end users) are provided a **more consistent user experience**
- ✓ Provide consistent, comprehensive **ORCID-related support resources for stakeholders**

An overview of ORCID's revamped CSP Program

FOR MEMBERS/ END USERS

FOR VENDORS / SERVICE PROVIDERS

The ORCID CSP Program has Evolved and Improved!

A brief timeline:

Pre-2023

ORCID's CSP Program v1.0 ("One Size Fits All" Approach) certified approx. 20 systems

Apr 2023

ORCID Launched a 1-month Public Consultation on proposed revisions to the CSP program

Jul 2023

After reviewing feedback & refining the criteria, ORCID's CSP program relaunched!

Mar 2024

A fifth workflow for 'Discovery Systems' was defined and certification criteria developed and published

Oct 2024

15 systems re/certified to date, with multiple new systems working on CSP compliance!

The ORCID CSP Program has Evolved and Improved!

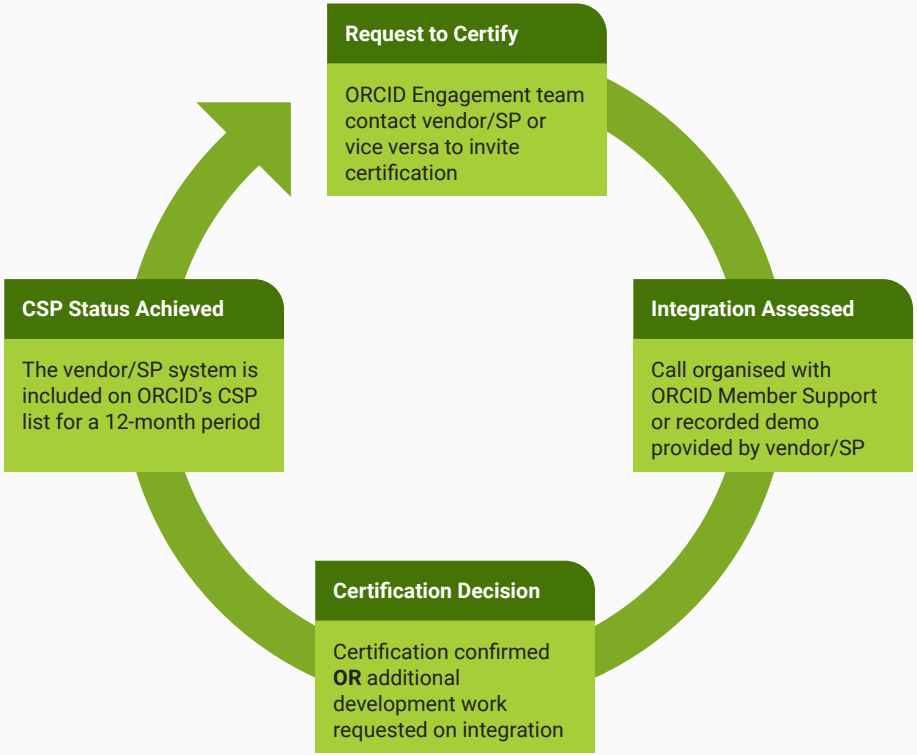
The current iteration of the ORCID Certified Service Provider program:-

- Defines **5 workflows/system types** which integrate with ORCID:
  - *Manuscript Submission Systems*
  - *Research Information Systems*
  - *Grant/Facility Application Management Systems*
  - *Repository Systems*
  - *Discovery Systems*

- With agreed best practices (i.e. **certification criteria**) for each
  - *Based on mandatory ('MUST' and 'SHOULD') criteria, as well as optional ('MAY') criteria*

- SP systems may be successfully certified for a period of **12 months** and are:
  - Included on ORCID's new CSP List web page with additional technical information
  - May be showcased in ORCID communications including our Member Connect newsletter, blog/social media posts, and on ORCID webinars and presentations at events

The Assessment & Re/certification Process is Cyclical



Critical Requirements specific to Manuscript Submission Systems

1. Manuscript Submission Systems (e.g. used by publishers, and society/university journals)

Certified Manuscript Submission System Providers MUST:

- Allow sign-in with ORCID iD and authenticate corresponding author and reviewed ORCID iDs
- Use data from ORCID records to make registration and submission easier
- Display authors' and reviewers' ORCID iDs to editors to make editing easier
- Collect authenticated ORCID iDs from co-authors/collaborators
- Collect authenticated ORCID iDs from reviewers
- Add peer review items to reviewers' ORCID records
- Include authenticated ORCID iDs in the metadata passed downstream
- Make sure works are added to ORCID records when they're published
- Enable ORCID member organizations to use their own ORCID membership credentials when configuring the system
- Document how platform users can use the ORCID functionality offered in training and promotional materials

Certified Manuscript Submission System Providers SHOULD:

- Make sure authenticated ORCID iDs are displayed on published articles (if applicable)

Certified Manuscript Submission System Providers MAY:

- Collect authenticated ORCID iDs for editors and conference organizers and add professional service items to their ORCID records

Critical Requirements specific to Research Information Systems

2. Research Information Systems (e.g. CRIS/RIM systems for research data management)

Certified Research Information System Providers MUST:

- Collect authenticated researchers' ORCID iD and permissions
- Display iDs of researchers
- Use data from ORCID records to populate researcher profiles and discover new researcher activity
- Add employment/education information to researchers' ORCID records
- Add works to researchers' ORCID records (if applicable)
- Add funding awards to researchers' ORCID records (if applicable)
- Enable ORCID member organizations to use their own ORCID membership credentials when configuring the system
- Document how platform users can use the ORCID functionality offered in training and promotional materials

Certified Research Information System Providers SHOULD:

- Add a link to the researchers' profile in the Research Information System to their ORCID record

Certified Research Information System Providers MAY:

- Add an affiliation to visiting researchers' ORCID records
- Allow administrators to associate ORCID iDs with authors/contributors

Critical Requirements specific to Grant/Facility Application Management Systems

3. Grant/Facility Application Management Systems (e.g. used by funders to manage awards)

Certified Grant/Facility Application Management System Providers MUST:

- Allow sign-in with ORCID iD and authenticate applicants' ORCID iDs
- Use data from ORCID records to make registration and application easier
- Collect authenticated ORCID iDs from collaborators
- Collect authenticated ORCID iDs from peer reviewers
- Provide applicants ORCID iDs to reviewers
- Add funding items to awardees ORCID records and/or add research resource items to awardees ORCID records
- Include authenticated ORCID iDs in any metadata passed downstream
- Enable ORCID member organizations to use their own ORCID membership credentials when configuring the system
- Document how platform users can use the ORCID functionality offered in training and promotional materials

Certified Grant/Facility Application Management System Providers SHOULD:

- Add service affiliations to panel reviewers ORCID records
- Add peer review items to reviewer's' ORCID records

Critical Requirements specific to Repository Systems

4. Repository Systems (e.g. institutional repositories to showcase research outputs)

Certified Repository System Providers MUST:

- Allow sign-in with ORCID iD and authenticate author's/contributor's ORCID iD
- Allow administrators to collect authenticated iDs and permission where metadata includes non-authenticated iDs
- Collect authenticated ORCID iDs from contributors
- Make sure ORCID iDs are displayed on hosted research outputs
- Make sure hosted research outputs are added to authors' ORCID records
- Include authenticated ORCID iDs in any metadata passed downstream
- Enable ORCID member organizations to use their own ORCID membership credentials when configuring the system
- Document how platform users can use the ORCID functionality offered in training and promotional materials

Certified Repository System Providers SHOULD:

- Use data from ORCID records to populate researcher profiles (if applicable)

Certified Repository System Providers MAY:

- Allow administrators to associate ORCID iDs with authors/contributors

Critical Requirements specific to Discovery Systems

5. Discovery Systems (e.g. abstract/citation & indexing databases, metadata aggregators etc.)

Certified discovery system integrations MUST:

- Collect authenticated users' ORCID iDs, and their permissions
- Use the ORCID ID and names contained in ORCID records to help users find content that belongs to them.
- Enable researchers to find their contributions, person identifiers and/or other information in the discovery service, and add them to their ORCID record
- Use a distinct API client ID to any other integration the organization may offer
- Keep the items added to ORCID records up to date with changes
- Discovery systems that create their own researcher profiles (or author clusters) MUST provide an option to researchers that continues to update the researcher's ORCID record over time as new information becomes available
- Document how platform/import wizard users can use the ORCID functionality offered, in training and promotional materials

Certified discovery system integrations MAY:

- Publicly display authenticated ORCID iDs per ORCID's brand guidelines only

Service Providers Benefit from Certifying with ORCID

1. Greater promotion of CSP systems to the ORCID member community

2. Enhanced Support from ORCID in developing & testing integrations

3. Advanced reporting on global integration usage for each SP member

4. The opportunity for greater collaboration with ORCID

5. Quicker integration setup for every member implementation

Current ORCID Certified Service Providers

Results of the first ORCID CSP Program survey of vendors & service providers

FOR VENDORS / SERVICE PROVIDERS

The 2024 ORCID CSP Vendors & Service Providers Survey

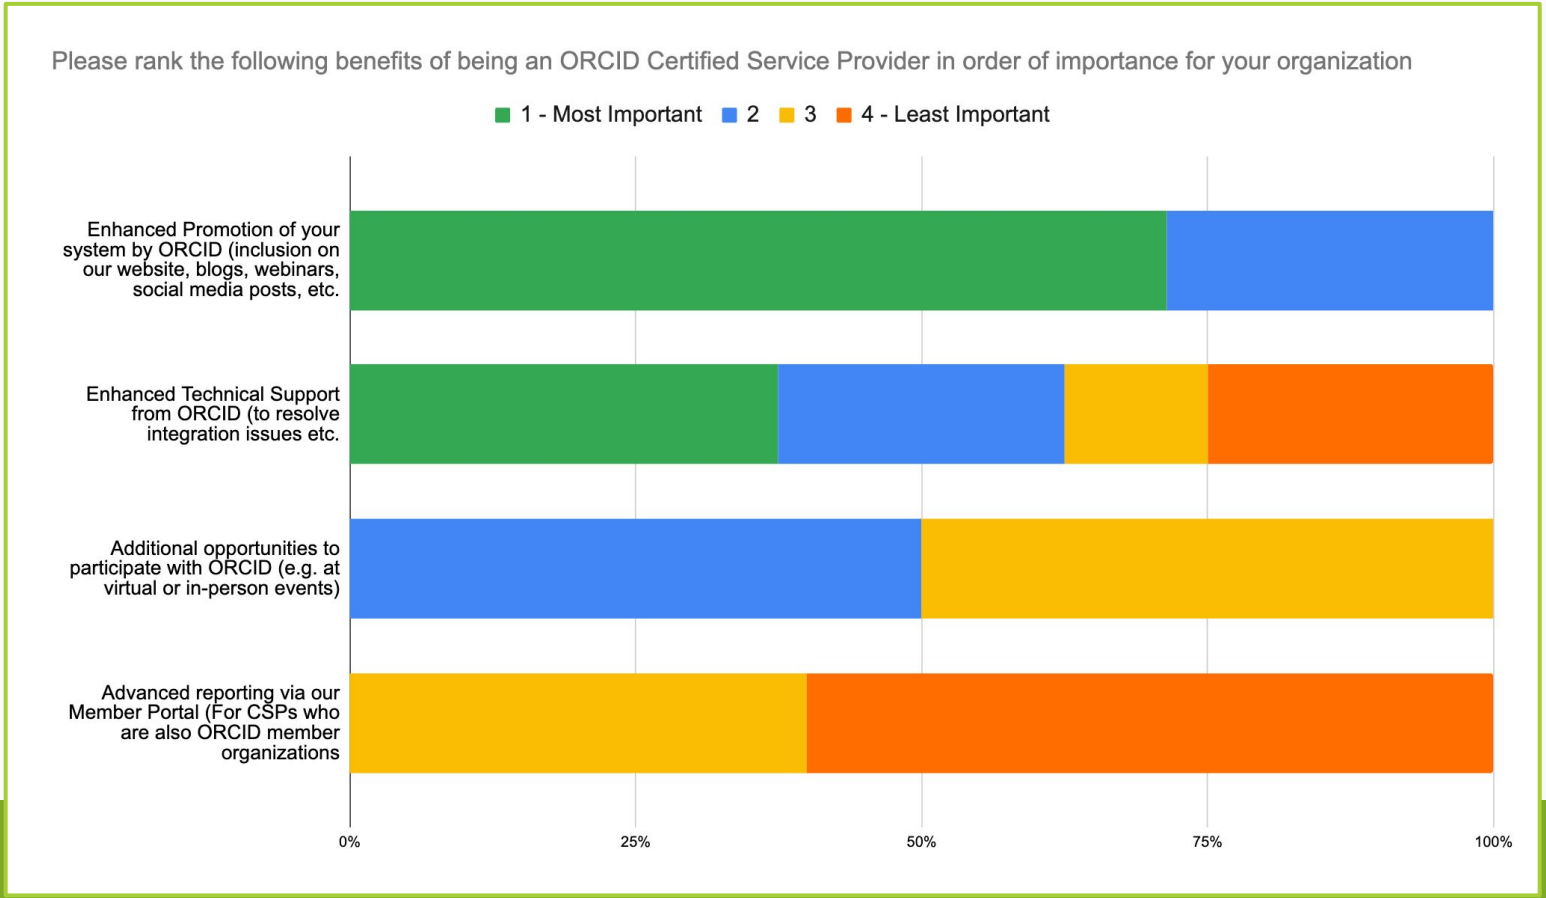
- Survey sent out in June and September 2024 to all current CSP vendors & service providers
- 12 questions - a mixture of multiple choice and open-ended, free text responses
- We received 8 responses out of a possible 14
- About 25% of respondents were Manuscript Submission System providers, while the rest were Research Information System providers
- 75% of respondents were from providers of commercial (i.e. paid-for) solutions
- 50% of respondents have collaborated with the ORCID Communications team to promote their system or integration functionality since certifying; the other 50% still planning to!

Key Insights from the Survey — Why did they certify?

“What was the key motivator for your organization to (re)certify your system(s) with ORCID?”

- To meet customer/national expectations and requirements
- To improve their integration functionality and meet best practices
- To continue to underline their commitment to supporting ORCID’s mission
- To increase use/adoption of their solution among ORCID member institutions

Key Insights from the Survey — What benefits are valued?



Key Insights from the Survey — Overall Satisfaction?

"On a scale of 1 to 5 (1 being strongly disagree and 5 being strongly agree), to what extent do you agree with these statements?"

Question	Responses
The ORCID certification criteria for our system type was clear and easy to understand	**75% positive**
The certification process was quick and easy	**75% positive**
We were happy with the support & guidance provided by ORCID staff	**100% positive**
Our customers/users greatly value the ORCID functionality provided by our integration	**87.5% positive**
Our ORCID CSP status has been beneficial in attracting new adopters/users of our service	**37.5% positive**
Our Marketing/Comms teams have used our ORCID CSP status to differentiate us from our competitors	**50% positive**

Key Insights from the Survey - Would they recommend it?

On the value of integrating with ORCID and certifying:

"Being able to integrate our system with ORCID demonstrates our commitment to our clients. Being a certified service provider provides assurance to our clients that we have a solid relationship with ORCID."

- InfoEd Global

"Recertifying as a certified system on the Certified Servicer Provider List helps us to show our users that we have a system that meets ORCID's expectations and provides the gold standard in interacting with the ORCID API. This helps us to attract more consortium members and more NZ ORCID Hub users.

- Royal Society Te Apārangi

"The CSP means that we are on a higher level of integration with international databases. Nowadays systems like ours must not only cover the functionality for manuscripts submission, peer-review and connecting authors, editors and reviewers but also offer a lot of integration features."

- Bentus Web Technologies

"We were very satisfied with the support and guidance from the ORCID Team; the process was clear-cut, allowing us to discuss and review use cases and technical challenges, ultimately leading to enhancements for both parties."

- 4Science

"ORCID integration offers several workflow advantages, such as supporting more accurate metadata for APCs and funding information, simpler single sign-on flows for users, Reviewer recognition, and Author attribution. Becoming a CSP ensures trust in the integration between EM and ORCID, and demonstrates our continued commitment to our partnership between Aries Systems and ORCID."

- Aries Systems

How can ORCID members maximise the benefit of their membership

FOR MEMBERS/ END USERS

Maximising the benefits of ORCID for end users

A few suggestions when selecting, implementing, developing or renewing an SP system:

1. For peace of mind, **ensure your selection, development or tender process incorporates relevant criteria** from ORCID CSP requirements for your defined system/workflow

2. Make your developers or vendor/SP aware of the **ORCID functionality that you would like to enable when integrating your system with ORCID**, to avoid missed opportunities

3. **Engage with your researchers/end users** to clearly communicate the benefits of using ORCID - our *'How to talk about ORCID'* resources can help with this!

4. Where your selected system does not yet meet CSP requirements, **make your developers or vendor/SP aware of your needs, and discuss realistic timeframes for improvement**

What next steps should members take?

- **Review the current ORCID-enabled systems your organization uses**
  - Have you fully enabled all integration features to write to ORCID records?
  - Is your system already an ORCID Certified Service Provider system?
  - If not, have you asked your vendor/SP if they are working towards certifying?
  - If they are not, does the system fully meet the needs of your researchers?

- **Join further ORCID Enabling Value webinars to learn more** about individual CSP systems and how they could benefit your organization and your researchers

- **Contact your ORCID Engagement Lead or Consortia Lead to learn more** about CSP systems, maximising the benefits of your membership, and how the ORCID community can strengthen research integrity and support researchers

Thank you for your time & attention!
